Title : From Curiosity to Cell Therapy:

My iPS Journey for Everyone

Guest : Mr. Ahmad Baihaqi (Malaysia)

Abstract : In this talk, I will share my journey from being a curious high school student to becoming a researcher in iPS cells. I will explain what iPS cells are in easy words, without difficult science terms. Together, we will look at how iPS cells are already used in medicine, what new treatments may come in the future, and also talk about common questions or worries people have. I will also introduce a little about my own research, and finally share my hopes and dreams for the future.
